# The volume on my directv remote wont work

DIRECTV remote volume not working is a typical issue with this portable handheld device. But people with hearing problems would have to struggle to keep up with their favorite digital satellite channels on the screen. Sometimes, even those who quickly get annoyed with loud sounds may also be at a disadvantage from having a malfunctioning DIRECTV remote volume. Today, we will look into the usual reasons why your DIRECTV remote volume not working and how to fix this problem. How to Get the Volume to Work on My DIRECTV Remote Most of you may have asked yourselves how to get the volume to work on my DIRECTV remote? But before we dive into the possible troubleshooting techniques you can try out, let us first discuss the primary reasons why this issue occurs. How To Fix DIRECTV Genie Mini Not Working Issue? Fix MethodsObstructions Between Receiver Since the Genie controller sends signals to your receiver, your two devices' pathway must be clear from obstructions. Aside from this, wireless equipment, such as microwave ovens, baby monitors, and cordless phones, may also interfere with your reception. Low Battery One of the most usual culprits for this issue could be your set of batteries. If your device has had the same set of batteries for months or even years, you may want to try replacing them as soon as possible. If not, a low battery power might interfere with your receiver reception. Unresponsive Buttons Another typical reason you are having difficulty changing your controller's volume is due to unresponsive buttons. When this happens, you won't be able to adjust your show's loudness and change from one channel to another. Can You Program DIRECTV Remote to TV Without ReceiverNot Programmed Properly DIRECTV users need to point their remote controls to their receivers to control their television. However, if your devices are not correctly programmed, you might have a challenging time controlling your program's volume. Fix DIRECTV Remote Volume Not Working There are several straightforward techniques you can try out on your own to resolve this issue. We suggest you do these first before purchasing a new controller or contacting DIRECTV's technical support. Step 1. Remove Obstructions Before trying out other complex techniques, make sure that there are no physical obstructions between your DIRECTV controller and receiver. Put away wireless devices that may interfere with your signal and place them as far as possible. DIRECTV Cancellation Policy ExplainedStep 2. Replace Batteries If your room no longer has physical obstructions between your controller and receiver, your next course of action should be checking whether your batteries are in good condition. You can do so by pressing and holding any button on your device for a few seconds. A green light indicates that you have adequate battery strength. However, a slow, blinking light or none at all means that you need a new set of batteries. Step 3. Reset Remote and Receiver The best way to resolve unresponsive buttons is by resetting either your remote or your receiver. To reset your receiver, you can follow these steps to guide you throughout the process: 1. First locate the red button on your receiver. Typically, DIRECTV receivers will have this on its side or inside its access card door. Where to Return DIRECTV Equipment - Quick Guide2. If there is no red button on your device, you can unplug its power cable instead. 3. Wait for around 15 seconds and then plug it back in. 4. Press and hold this button until your device restarts automatically. However, if resetting your receiver does not resolve your issue, you can try any of the methods below to reset your remote: Method 1 Press the Menu button, and then navigate the Settings tab.Click on the Remote-Control menu and choose Pair/Program Remote.When prompted, enter the 5-digit code for your respective TV manufacturer.You can visit their official remote code webpage to find yours. Method 2 Press both the Select and Mute buttons together until the light indicator blinks thrice.Press 9-8-1 in the same order and then Select.Wait until the remote blinks four times, indicating a successful factory reset. Can You Program DIRECTV Remote to TV Without ReceiverStep 4. Pair Your Remote with Your Receiver If you are unsure whether your controller is appropriately set up to control your receiver, you can follow these steps to guide you throughout the process: Hold the Enter button on your device for at least three seconds.When a Source menu pops up on your screen, select your preferred receiver input source.Afterward, press both the Enter and Mute buttons on your device simultaneously while pointing your remote to your receiver.If your device was successfully paired, you should see the Applying IR/RF Setup message on your screen. Re-program Genie Controller If you reset your device, you may need to re-program your Genie controller again. Fortunately, you can do so automatically or manually. DIRECTV Cancellation Policy ExplainedAutomatic Programming The most convenient way to program your controller to your television is by automatic programming. You can follow these steps to guide you throughout the process: Step 1. Press both the Enter and the Mute buttons simultaneously while pointing your controller to your receiver. Release the buttons once the light indicator on your device turns and blinks green twice. Step 2. Afterward, you will receive the Applying IR/RF Setup on your television screen, indicating that your set up is ready. Step 3. Press the Menu button on your controller, and then go to the Settings & Help menu. Step 4. Select Settings and then choose the Remote-Control option. How To Fix DIRECTV Genie Mini Not Working Issue? Fix MethodsStep 5. Select Program Remote and then follow the instructions on your screen. Manual Programming If you cannot program your remote to your television automatically, you can follow the steps below for manual programming: Step 1. Press both the Select and the Mute buttons simultaneously while pointing your controller to your receiver. Step 2. Release the buttons once the light indicator on your device turns and blinks green twice. Step 3. Type in 9-6-1 on using your device when prompted. Step 4. Click on the Channel Up button and then the Enter button afterward. Step 5. Confirm your selection. You will then receive an on-screen message indicating that your device is ready for set up. Where to Return DIRECTV Equipment - Quick GuideStep 6. Follow steps 3 to 5 of the Automatic Programming technique. Conclusion After reading these steps, I am sure you can fix your DIRECTV remote volume issue. This non-working is not a serious issue and can be fixed as mentioned. However, if still your issue is not fixed you can contact the support staff or get a new remote. By Shawn Farner Updated September 28, 2017 DirecTV is a television service provider that offers TV service via satellite. When you're subscribed to the DirecTV service, you're given a set top box and a remote that can control the DirecTV box as well as other devices. If you'd like to control the volume on your TV using the DirecTV remote control, you can do so by programming the remote to work with all of your TV's features. A wizard built into the DirecTV box can help you do this in a few steps. Turn on the DirecTV box and your TV.Press the "Menu" button on the remote. Move through the options using the arrow buttons on the remote and select "Parental, Favs and Setup" using the "OK" button.Select the "System Setup" option using the arrow buttons and "OK" button.Highlight the "Remote" selection and press "OK."Choose the "Program Remote" option and follow the on-screen instructions to program your remote to work with your TV set. When finished, the volume up/down buttons on the remote will work to control your TV's volume. Remote volume does not work on DirecTV. This is a common problem with portable handhelds. But people who can't hear by ear have to struggle to keep their favorite digital satellite channel on the screen. Often people get frustrated quickly by the loud sound of the TV. They, too, can often be damaged due to a defect in the DIRECTV remote volume. Today in our article, we will look at why DIRECTV remote volume does not work and how to fix this problem today; we will consider the common cause. How to Get the Volume to Work on My DIRECTV Remote: Many of you may have asked yourself how to match the volume for my DIRECTV remote to work? But before we dive into the potential troubleshooting techniques you can try, let's first find out why this problem occurs and discuss its primary cause here. Barriers Between Receivers: The Genie controller works to send a signal to your receiver. Therefore the path between your two devices should be clear from the obstruction. In addition, wireless devices such as baby monitors and cordless phones can interfere with your reception. Low Battery: One of the most common culprits for this problem is your battery set. If your remote has had a very old or used battery for years, you should replace it as soon as possible. Otherwise, this low-charge battery can interfere with the reception in your power receiver. Unresponsive Button: Another typical reason you are having trouble changing the volume of your controller is due to unresponsive buttons. When this happens, you can't adjust the loudness of the show running on your TV, and you can't even switch from one channel to another. Not Properly Programmed: DIRECTV users need to show their receivers their remote control in order to control their television. If our device is not programmed properly, you may have a challenging time controlling the volume of your program. Suggested Read: Samsung TV Volume/Sound Not Working: FIXED Fix DIRECTV Remote Volume Not Working: There are many simple ways to solve this problem that you can use at home. We recommend that you try this before purchasing a new remote or contacting support for DIRECTV technology. Step 1: Overcome Obstacles Before using any other complex technology, make sure that there are no physical barriers between your DIRECTV controller and the receiver. Avoid wireless devices that may interfere with your signal and keep them as far away as possible. Step 2: Replace The Battery: If there is no physical obstruction in your room now, you should check if your controller's battery is in good condition in the next operation. You can do this by pressing and holding any button on your device for a few seconds. The green light indicates that you have enough battery power. If it's not slow, flickering, or not at all, then you need a new set of batteries. Suggested Read: Samsung TV Plus Not Working: What To Do? Step 3: Reset The Remote and Receiver: The best way to resolve unresponsive buttons is by resetting your remote and receiver. You can follow the steps below to guide you through the entire process of resetting your receiver. First, find the red button on your receiver. The DIRECTV receiver will usually be next to it or inside its access card door. If your device does not have a red button, you can unplug its power cable instead. Wait an estimated 20 to 25 seconds and then plug it again. Hold down this button until your device restarts automatically. Although resetting your receiver does not solve your problem, you can use one of the two methods below to reset your remote. Method 1: Press Menu Button, then navigate to the Settings tab. Click on the Remote Control menu and select Pair/Program Remote. Enter the five-digit code for your respective tv manufacturer when prompted. Method 2: Select both and press the mute button together until the light indicator flashes three times. Press 9-8-1 in the same order and then select. Wait until the remote flashes four times. This indicates a successful factory reset. Step 4 Pair Your Remote with Your Receiver: If you are not sure if your remote is properly set up to control your receiver, you can follow the steps below to guide you through the whole process. Hold down the Enter button on your device for at least 3 seconds. When the Sources menu pops up on your TV screen, select your favorite receiver input source. Then press the Enter and Mute buttons simultaneously on your device while pointing your remote towards your receiver. If your device is successfully connected, you should get a message to apply IR/RF setup on your screen. Suggested Read: How to Reset JBL Speaker | The Definitive Guide Re-program Genie Controller: If you reset your device, you may need to reprogram your genie controller. Luckily you can do this automatically or manually. Automatic Programming: The most convenient way to program your controller on your TV is automatic programming. You can follow these steps to keep you informed throughout the process: Step 1: Press both Enter and Mute buttons simultaneously while your controller points to your receiver. Release the buttons once the light indicator on your device turns green twice and flashes. Step 2: You will then receive an applying IR/RF setup on your tv screen, showing you that your setup is ready. Step 3: Press the Menu button on your controller, and then go to the Settings and Help menu. Step 4: Select the setting and then select the remote control option. Step 5: Select the program remotely and then follow the on-screen instructions. Manual Programming: If you can't automatically program your remote on your tv, you can follow the steps below to perform manual programming. Step 1: Select your controller while pointing to your receiver and press the mute button simultaneously. Step 2: Once the light indicator on your device turns green twice and blinks, release the buttons. Step 3: Type 9-6-1 to use your device when prompted. Step 4: Click on the Channel Up button and then click on the Enter button. Step 5: Confirm your choice, then you will receive an on-screen message indicating that your device is ready for setup. Step 6: Follow steps 3 through 5 in Automatic. Frequently Asked Questions (FAQs): Why is the volume not working on my DirecTV remote? Change the volume channel and fix another remote problem: We recommend keeping the receiver in an area that is free from any kind of obstruction. Press and hold any button on your remote to test the battery power of your remote if you notice that the fast flickering green light fixes the battery. But that needs to change soon. How do I set the volume on my DirecTV remote? Slide the mode switch to AV1, AV2, or TV position. Lock volume. Press and hold the MUTE and SELECT keys until the green light under the selected switch flashes twice and release both keys. Using the number key, enter 9-9-3. (The green light flashes twice.) Press and release the SELECT key. Why is the volume on my TV not working? Check the audio settings on your tv and connected device. Turn off and unplug your tv and connected device. If so, there may be a problem with the HDMI sound not working on the TV. Swap the media device for another or change the tv speaker output to the internal speaker to see if it fixes the sound. Why is my volume not working on my Samsung TV? If this doesn't work, go to the menu using your Samsung tv remote. From there, select Sound and then select Extra setting or speaker setting. We set the auto volume to normal. (Sound> Additional Settings / Speaker Settings> Auto Volume> General) Like this post? Could you share it with your friends? Suggested Read - Conclusion: I hope that with all the steps outlined above, you can easily solve your Directv Remote Volume problem. This non-functioning problem is not a serious problem and can be fixed as shown. If your problem is still not resolved, you can contact the support staff or get a new remote.
